# INCREMENTAL LEG ADJUSTMENT RANGE

# LEAP LEG

The Leap leg is a sturdy and functional choice for bench support and integrates seamlessly with pre-existing components and support frames. Showing more body than the Rifle leg, the Leap leg is a perfect design choice when the prominence of colour is the preference.

Incremental adjustment of the leg is allowed, and adjustable feet ensure congruent heights amongst bench style positions. Made to match the white finish of worktops as a standard, the Leap is able to be installed in a swift fashion with little interference to the office environment.

# LEAP LEG

Stylish and Cost Effective solutions for Bench Style Workstation Applications

# RIFLE LEG

The Rifle leg is a quick use component that allows bench style desks to be installed with ease. Attached to stiffening beams and supports that run underneath a worktop, the versatility of this leg is it's greatest strength.

Adjustable glides and leg height increments provide options for user preferences and differences in installation environment. Powdercoat finished legs and supports provide end users with options for professional colour scheme to match pre-existing themes.

# RIFLE LEG

The Leap Leg and Rifle Leg are your go to choice for minimal design and simple installations
