ME.TRI

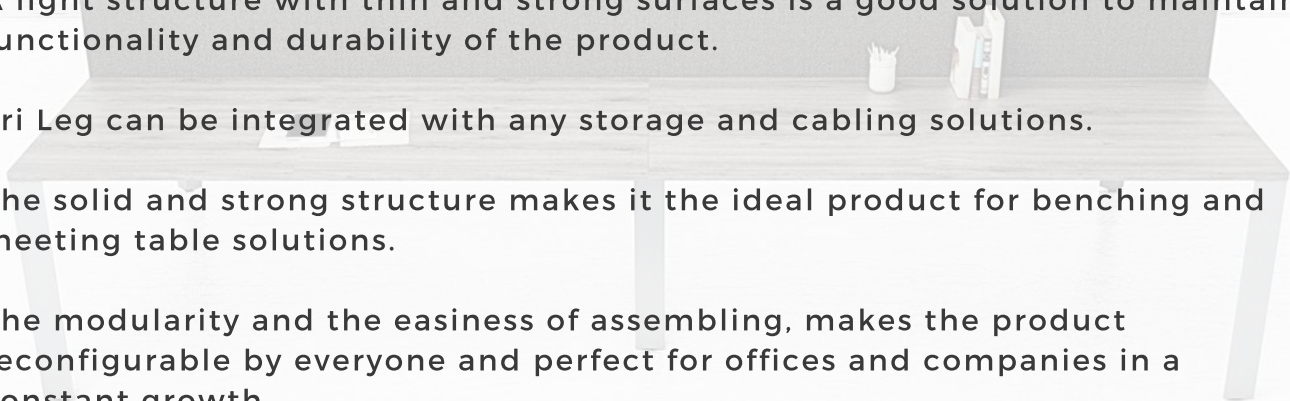

Tri Leg is the operative office collection dedicated for a minimalistic design, featuring a triangle shaped leg.

A light structure with thin and strong surfaces is a good solution to maintain functionality and durability of the product.

Tri Leg can be integrated with any storage and cabling solutions.

The solid and strong structure makes it the ideal product for benching and meeting table solutions.

The modularity and the easiness of assembling, makes the product reconfigurable by everyone and perfect for offices and companies in a constant growth.

Advanced functionalities, clean design and extreme flexibility are the main characteristics of the brand new Me.Tri collections.

The product is based on a solid structure composed by perimetrical traverses and joint points for leg storage.

These are based on a functional profile created by Codess and represents the core concept for the product.

The profile allows for accessories such as return-cable, PC, Printers or any other elements to be integrated.

Me.Tri is available in a single table, team-table and bench configurations
